

# COVID Economic Recovery Index

The index is composed of three pillars:

1. Absorption Capacity - the degree to which the country's economy can absorb the COVID shock.
2. Economic Resilience - the degree to which the country's economy is dynamically resilient in the face of the COVID pandemic.
3. Health Resilience - the degree to which the country's population is exposed to the risk of the COVID pandemic.

**COVID Economic Recovery Score** 0  100
